About US

Electronic Network Services Limited, was established in 2009 and incorporated in 2011.

We are the leading telecommunication and information technology solutions providers in Uganda with a strong, committed and talented team that provides an extensive range of telecom & IT services.

Electronic Network Services has built a reputation of delivering these services with excellence and in a timely manner that has endeared us to the biggest market players in the information technology industry today.

Our Services

OSP Installation works

We provide end-to-end Outside Plant (OSP) installation services,

Wireless technology Solutions

We provide innovative and cost-effective wireless technology solutions, including Point-to-Point & Multi-Point Links, Wi-Fi, Fiber Switching, and 2-Way Radio Communication. We design, install, and maintain seamless connectivity for cellular operators and enterprises.

Telecommunications Infrastructure Maintenance

Our Maintenance Services Include:

Telephone Infrastructure Maintenance, Transmission & Microwave Installations Maintenance, Fixed & ADSL Network Maintenance, Copper Network Maintenance, Radio Technology Equipment Maintenance, Optical Fiber & Structured Wiring Maintenance, Civil Works & Cell Tower Maintenance

Site Acquisition

We specialize in end-to-end site acquisition services, ensuring telecom operators secure prime locations for BTS station installations. We navigate the complex process of land acquisition, legal approvals, and infrastructure setup, allowing operators to focus on expanding their networks without delays.
